21 - What class activity or assignment did you like the best and why?

Natalia Guggisberg

Response Rate 9/13 (69.23%)

- There were not many things that we did, a couple of the homework assignments were useful in understanding the information.
- N/A
- Deffinetly the labs performed.
- THERE REALLY WAS ONLY 1 ACTIVITY WHERE WE MADE AGAR CULTURES.
- My favorite activity was the hematology lab. It was very informative and enjoyable.
- We only had one relevant lab for the class and there was no lab report or written instructions, only verbal instructions, no guidance or direction. All lab time was lecture time the entire semester, and all she did was read the PowerPoint slides that she did not even make herself. Assignments took me 5 minutes to complete and I did not learn a single thing, there was never any feedback, she just graded all of them and gave us all a 100% and did not care about late work because she couldn't even remember what due date she told us
- I really appreciated going over the review questions in class after each chapter I try to answer them on my own just to quiz myself and then we go over the answers that is very helpful. I also like that she does the tests open note except the final because that makes me feel like I am doing more review and better prepare for the final.
- I love the quizzes because it helps me to retain the questions and is a great resource tool to refer to. I also like the crossword puzzles that Dr. G gives in class, it makes me go into the book and look for the answer which helps me to remember the information better.
- I really enjoy the open book quizzes and worksheet materials such as the crossword sheet they help me learn and memorize the material

Hagerstown Community College

FA 22 Course Evaluations- MLT 101

Course: MLT-101L-01: Intro to Medical Lab Tech: Lab
Instructor: Natalia Guggisberg *
Response Rate: 9/13 (69.23 %)

22 - What class activity or assignment was the least useful and why?

Natalia Guggisberg

Response Rate 8/13 (61.54%)

- More hands on stuff
- N/A
- WE DIDN'T REALLY HAVE ACTIVITIES.
- I don't think that I have one.
- We didn't have labs, we never got feedback from assignments and they were all questions we could copy from the book. All quizzes and exams were open book and she gave us all high grades so nobody even cared to study
- I don't think anything was not useful in this class.
- Cannot think of anything that was "least" useful. Everything Dr. G provides for us is for our benefit.
- love the powerpoints but i wish they were more detailed

23 - What specific recommendations do you have for the course or instructor?

Natalia Guggisberg

Response Rate 8/13 (61.54%)

- More labs would be helpful. If we are paying the lab fee, there should be labs that are laid out for us to help understand what we are going over that week.
- N/A
- THE COURSE NEEDS TO BE MORE INVOLVED. PROFESSOR G ONLY READ SLIDES FROM A POWER POINT OUTLOUD, WHICH IS THE SAME THING SHE IS DOING IN ALL OUR CLASSES THIS SEMESTER. QUESTIONS TYPICALLY DO NOT GET ANSWERED, SHE SAYS WE WILL GET TO THAT LATER. THERE ARE NEVER ANY LABS IN OUR LAB COURSES, JUST MORE READING OF POWER POINTS, AND 9 OUT OF 10 TIMES THERE WILL BE THINGS ON TEST OR QUIZZES THAT WE HAVEN'T DISCUSSED.
- I wish that some of the labs could have lasted longer, and that venipuncture could have been taught.
- I thought after the first semester everything was going to get better but it's all the same, no guidance, no instructions, she's not teaching anything; only reading the slides word for word, no labs, no feedback. I used to be very passionate about this program but that is gone now
- I really like her teaching and how she goes over the information and does the review questions after every chapter. Everything through the whole semester really helped me feel like I was preparing for the final and board exam. I also like how understanding she is about other peoples schedule and how flexible she is with us. I would like to do more hands on labs and I know she does what we have the stuff to do and is always trying to figure out more labs for us to do.
- I appreciate Dr. G for putting all of her effort into this program, especially with the program being new it takes a lot of effort for one professor to lead a whole class to learn new things as we are doing now. The open book quizzes are very helpful, does not put a lot of stress on students especially with the amount of content that needs to be covered. It gives us students the opportunity to study and actually retain the information. Professor G answers any questions we have and always asks us if we have any questions or if we want to further learn a topic that was more difficult than others. There are some students who do not pay attention in class and yet still complain which is frustrating for us students who are actually present mentally and physically, maybe if they payed more attention in class they would not have complaints. I am very satisfied with this program and the amount I am learning. Thank you to Dr. G for all of her efforts!
- i would like more fun worksheets like the crossword and more study material like study guides

24 - The instructor explained the materials and equipment to be used in lab.
