

NAACLS Board of Directors' Accreditation Award

The Progress Report from the Medical Laboratory Science Program of **The New York and Presbyterian Hospital** in **Brooklyn, NY** addressing **2012 Standards II.B and II.C** (2024 Standards II.B, II.C, and II.D) is deemed unsatisfactory.

Next Submissions for Program Review	End Accreditation Date
Self-Study Report: April 1, 2027	April 30, 2028

Typically, the program would be required to submit a Progress Report in one year to address the citation listed below. However, due to the timing of the reaccreditation and the Progress Report due date for the remaining concern, the program should address the concern in detail in the Self-Study Report under the **2024 Standards**. Please refer to the "Next Submission for Program Review" chart for due date.

The program is in partial compliance with the following Standard:

Standard II.C.2 II. Assessment and Continuous Quality Improvement
C. Program Assessment and Modification
The results of program outcomes measures and assessment must include findings from graduate and employer feedback and be:
2. Analyzed to demonstrate the effectiveness of any changes implemented.

Rationale The results of program outcome measures and assessment included findings from graduates and employer feedback, and such findings were reflected in curriculum development, resource acquisition/allocation, and program modification, but due to timing, subsequent changes were not analyzed to demonstrate effectiveness of changes implemented.

Recommendation Submit evidence of analysis which demonstrates the effectiveness of any changes implemented in the next Self-Study Report according to the new 2024 Standard language below.

Standard II.D.4 II. Assessment and Continuous Quality Improvement
C. Program Assessment and Modification
All programs must make efforts to continually improve by:
4. Assessment of effectiveness resulting from any changes implemented.

Failure to submit the required report(s) by the due date may result in Probationary Accreditation.
